

## **AGT** PRODUCTS inc.

## CASE STUDY

### The Company:

AGT Products Inc. is located in Mississauga, ON, Canada, and is a leader in building materials and the largest distributor of pre-finished subfloor products. They are also part of the Lumber and Other Construction Materials Merchant Wholesalers Industry.

### The Challenge:

AGT Products Inc. had outgrown its previous ERP System which had issues accessing and retrieving data as well issues with app integrations .

### The Solution:

AGT Products Inc. considered numerous ERP solutions and after many discussions and a recommendation from Andrew King, they decided to implement Dynamics 365 Business Central. The implementation included many components including; manufacturing, supply chain, core financials, purchasing, sales, EDI, and a POS integration. WebSan implemented Dynamics 365 in a 5-month timeline allowing AGT Products Inc. to utilize the many features of the Microsoft Ecosystem. With the support from WebSan, AGT Products Inc was able to integrate its many applications to its Dynamics 365 system along with customizations specifically designed to meet their business needs.

“

**Kudos to the WebSan team, for being able to integrate and customize 10 different business-based solutions into our Dynamics 365 ERP system, allowing us to meet our business needs. We are now able to process 90% of our 400-500 orders daily with EDI within Business Central.**

”
