

CASE STUDY

The Company:

Nexeo is a proven leader in simplifying business through complete HR solutions resulting in lower costs, increased productivity, and reduced risk.

The Challenge:

Nexeo found that reconciling their bank accounts manually was quite the challenge as they processed several thousand checks a month.

The Solution:

WebSan set up the Electronic Reconcile feature for us. This was very helpful in speeding up our process.”We were under a time constraint, as we were trying to close the month with several new high-volume bank accounts. We requested the project be done as quickly as possible to get close done on schedule. Julio delivered quick results that helped our process a lot.”

“

WebSan set us up with Great Plains earlier this year and has been a good partner for any needs we have had
